## EXPLANATORY NOTES

## NOTES EXPLICATIVES

**1. Source of Data:** Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.

### 2. Coverage:

**a. Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

**b. Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods. From January 1964 statistics of re-exports have included exports from customs warehouses, which were previously excluded. This parallels a change in import statistics, which from January 1964 have included goods entered into customs warehouses rather than goods cleared from customs warehouses.

**c. Exclusions:** The following commodity movements are excluded from export statistics (some are recorded separately as Special Transactions—Non-trade in Tables 5): gold and gold products where the value of the gold content is 80% or more of the total value, except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings class (256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

**3. Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

**4. Quantities:** Tables 3, 4 and 5 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. 1 (DBS Catalogue No. 12-521). Where no unit of quantity is specified, a small dash appears in the quantity columns.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units

**1. Source des données:** La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes, sauf dans le cas des données sur l'électricité et le pétrole brut exporté par oléoduc. Les rapports sur l'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national de l'énergie, tandis que les compagnies exportatrices de pétrole par oléoduc fournissent directement leurs rapports au Bureau fédéral de la statistique.

### 2. Couverture:

**a. Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

**b. Réexportations:** La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou le réemballage ne modifient pas l'état des marchandises importées. À compter de janvier 1964 la statistique des réexportations comprend les exportations des entrepôts de la douane qui précédemment étaient exclues: ceci est comparable au changement apporté dans la statistique des importations qui, à compter de janvier 1964, comprend les marchandises entrant dans les entrepôts de la douane plutôt que les marchandises dédouanées des entrepôts de la douane.

**c. Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des exportations (quelques-uns sont classés séparément comme transactions spéciales—hors commerce dans le tableau 5): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale, sauf les alliages d'or dentaire (classe 880-29) et une petite quantité de déchets d'or sous forme de balayures de bijoutiers (classe 256-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes; les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger ou réexportées à l'extérieur du Canada par les forces armées des alliés du Canada de l'OTAN ou par les diplomates étrangers; les exportations provisoires pour les expositions ou les concours (et les films exportés en vue de leur projection ou de leur développement ou les films retournés après projection ou développement au Canada); les exportations aux alliés du Canada de l'OTAN financées en vertu des lois sur les crédits de défense; les approvisionnements de soutes et de navires vendus aux navires et aéronefs étrangers dans les ports canadiens; en général, toutes les exportations provisoires et les marchandises qui séjournent temporairement en transit, en territoire canadien.

**3. Pays de destination:** Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

**4. Quantités:** Les tableaux 3, 4 et 5 donnent les quantités selon le système d'unités indiquées pour chaque catégorie dans la Classification des marchandises d'exportation, Vol. 1 (B.F.S. numéro de Catalogue 12-521). Lorsque l'unité de quantité n'est pas requise, un petit tiret s'inscrit dans les colonnes de la quantité.

Les unités de poids ou de volumes visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état

exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in Canadian export statistics are defined on page 7 under "Abbreviations, Definitions and Units of Quantity".

5. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.

6. **Abbreviations:** Many descriptions of countries and regions used in this volume are abbreviated. A key to abbreviations of countries and regions appear on page 8.

assez complet) exportés, en excluant les pièces (dans n'importe quelle catégorie de marchandises où la valeur enregistrée comprend les articles complets de même que les pièces de ces articles, il est impossible d'établir la valeur moyenne par unité complète). Toutes les unités de quantité employées dans la statistique canadienne des exportations sont expliquées en page 7 sous la rubrique "Abréviations, définitions et unités de quantité".

5. **Valeurs:** Les documents d'exportations définissent la valeur des exportations comme "la somme réelle reçue ou à recevoir en dollars canadiens, à l'exclusion de tous les frais" (de transport, d'assurance, de manutention, etc.). Cette définition établirait donc la valeur des exportations f. à b. point de destination, mais en réalité, on ne la respecte pas toujours. Par exemple, au cours des dernières années une proportion importante mais indéterminée des exportations a été déclarée en dollars américains.

6. **Abréviations:** Plusieurs descriptions de pays et de régions utilisées dans le présent volume sont abrégées. La clef aux abréviations visant les pays et les régions est donnée en page 9.
